

Alberto Gloder, UX/Product Designer

As a freelancer I designed across AI/NLP, healthcare, finance, insurance, consumer products, academic research and energy. At my previous workplace I streamlined our processes and incremented site's visualizations by 400%, sales by 200%. In 2 years we could launch a new brand, open a new branch office and move to new headquarters. Stakeholders first, technology second. Open to new collaborations.

ABOUT

I am seeking

a position as a UX or product designer in a design mature organization where I can apply my skills and create something meaningful to someone. An environment where there are no rockstars, every voice is heard, help is given and taken in abundance.

I have achieved, also thanks to my teams

the trust and happiness of my clients, a hackaton victory and every project award available in my M.Sc. I also published a short paper in a conference by the world's leading computing society.

My abilities include

qualitative and quantitative user research, design thinking, scenarios, persona creation, storyboarding, lean UX, UCD, interaction design, design strategy, co-design, workshops, design sprints, usability tests, wireframing, user journeying, rapid prototyping, visual design, UI specs, ux writing, user testing.

I am proficient in

Adobe Suite, Figma, Sketch, Craft, InVision, Miro, Mural, PowerPoint, Excel.

I have programming skills and experience in

Python, HTML5, CSS3, JavaScript, React, Git.

I speak

Italian and English.

Got some hobbies

I like to enjoy the great outdoors on a hike, cook for my loved ones, travel the world, help my local community and to play tabletop, roleplaying games and videogames.
